Interests below in alphabetical order specifically affect this property but do not appear on the Certificate of Title. For further information and Legislation details, see <https://www.landgate.wa.gov.au/land-and-property/property-ownership/property-interest-report/interest-dictionary>.

### **1 in 100 AEP Floodplain Development Control Area**

**Responsible agency:**  
Department of Water and  
Environmental Regulation

#### **Definition of Interest:**

1 in 100 Annual Exceedance Probability (AEP) Floodplain Development Control Area delineates land that may be affected by the 1 in 100 AEP flooding and therefore subject to development control.

#### **Affect of Interest:**

This property **has been identified** as either being:

- within the 1 in 100 AEPI floodplain; or
- within 300 metres of the floodplain and may be affected by flooding during a 1 in 100 AEP flood.

Please note: Where risk has been identified to a property within this report and construction has occurred on the land, contact your relevant Local Government Authority for management remediation plans relevant to your property, or for properties being purchased off the plan, contact your developer.

#### **1 in 100 AEP Floodplain Areas:**

**Floodplain Development Strategy Area** - Swan River and tributaries (Upstream of the Causeway) - Perth

**Coverage** - DWER - BMT WBM: Swan and Helena Rivers Flood Study and Floodplain Management Plan - Hydraulic Modelling Final Report; see AEP flood event rasters (T:\S&P\WA&A\WRA\Floodplain Management\FPM\Swan River\EMRC Swan River Review\02\_Hydraulics\09b\_Hydraulic\_Modelling\_Data) & Furgo: Armadale to Dunsborough Lidar Survey (2008)

The Floodplain Development Strategy for the area recommends that proposed development that is located:

- outside of the floodway is considered acceptable with respect to major flooding, however, a minimum habitable floor level of 0.50 metre above the adjacent 1 in 100 AEP flood level is generally recommended;
- within the floodway and is considered obstructive to major river flooding is not acceptable.

There is a 1% chance of the 1 in 100 AEP flood level (or greater) occurring in any one year. Larger floods will occur but will be less frequent.

As some flood risk can be mitigated through appropriate building conditions imposed by Local Government, the relevant Local Government can be contacted to ascertain if the flood risk to this property has been mitigated.

The Department of Water and Environmental Regulation (DWER) can be contacted on (08) 6364 7600 or [flood@water.wa.gov.au](mailto:flood@water.wa.gov.au) for further site specific flood information or see [www.water.wa.gov.au](http://www.water.wa.gov.au).

Marginal	500-1000 mg/L TDS (suitable for selected agricultural use)
Brackish	1000-3000 mg/L TDS (used for parkland irrigation)
Saline	3000-35,000 mg/L TDS (industrial use and stock watering up to 10,000mg/L)

Mosquitoes can be a serious nuisance in certain regions of Western Australia and can spread disease-causing viruses such as Ross River, Barmah Forest, Kunjin and Murray Valley encephalitis viruses.

**Affect of Interest:**

The selected area **is impacted** by the risk of mosquito-borne diseases.

Details are as follows:

**Mosquito-borne Disease Risk:**

carrying mosquitoes in some years, depending on environmental conditions.

### Frequent high and occasional very high risk

The selected area is in a region that frequently experiences problems with nuisance and disease carrying mosquitoes, and severe issues are also experienced in some years depending on environmental conditions.

### Low or unknown risk

This location has not experienced high rates of mosquito-borne disease in the past. However, the sporadic nature of mosquito-borne disease outbreaks means that this not necessarily a precise indicator of future risk. Furthermore, regions with low or no resident human population may also be classified as low risk even though there may be an undocumented high risk in the area. Finally, significant mosquito nuisance issues may still be experienced, despite a low health risk.

Residents are advised to avoid exposure to mosquitoes and minimise mosquito breeding around the home as appropriate, particularly following extreme weather events such as heavy rainfall, high tides (in coastal areas) or localised flooding that may create abnormally large areas of mosquito breeding habitat.

For information on mosquito control in your local area or to report a mosquito problem please contact your Local Government Environmental Health Officer.

For more information about mosquito management, contact the Environmental Health Directorate on (08) 9388 4999 or email [medical.entomology@health.wa.gov.au](mailto:medical.entomology@health.wa.gov.au) or see [http://ww2.health.wa.gov.au/Articles/J\\_M/Mosquito-management](http://ww2.health.wa.gov.au/Articles/J_M/Mosquito-management).

### Perth Airport - Aircraft Noise

#### Responsible agency:

Perth Airport

#### Definition of Interest:

Property in the vicinity of Perth Airport may be exposed to aircraft noise which can affect individuals in different ways. It is important that aircraft noise impacts are considered and understood when making appropriate property and lifestyle decisions. #### Affect of Interest:

The selected property **is within** the N65 noise contour for Perth Airport and is exposed to aircraft noise. The N65 noise contour map describes the number of aircraft events greater than 65 decibels that can be expected over an average day. ### Residual Current Device

#### Responsible agency:

Department of Energy,  
Mines, Industry  
Regulation and Safety

#### Definition of Interest:

Residual Current Devices (RCDs) monitor the flow of electricity from the main switchboard and prevent electrocution by cutting the electricity supply if an imbalance in the current is detected. At least two RCDs must be fitted before land title is transferred.

#### Affect of Interest:

All home sellers and landlords must ensure that RCDs are installed in accordance with the Electricity Regulations to protect all power points and lighting circuits. RCDs cut the electricity supply instantly if a person touches a live part and receives a shock. By installing two or more RCDs, the property's circuits can be divided evenly between them, ensuring some light and power remains if one RCD operates. Multiple RCDs also avoid nuisance operation caused by appliances with low-level leakage currents. All properties constructed after 2000 should already have two RCDs fitted. Two RCDs must be fitted to protect all power points and lighting circuits in all homes before the land title is transferred. If you are planning to sell your home and it does not already have two RCDs protecting all power point and lighting circuits, you will need to engage a licensed electrical contractor to install them to comply with the Electricity Regulations.

Landlords must ensure RCDs are installed in accordance with the Electricity Regulations. If RCDs are not fitted, tenants should contact the managing agent or landlord and request that RCDs be installed as required.

**Description** - Strategic freight and/or major traffic route  
State Planning Policy (SPP) 5.4 - Road and Rail Noise (2019)

A key objective of SPP 5.4 is to minimise the adverse impact of road and rail noise on noise-sensitive land-use within the specified trigger distance of transport routes, whilst protecting future freight operations of these transport corridors.

Where any part of the lot is within the specified trigger distance, an assessment against the policy is required to determine the likely level of transport noise and management/ mitigation required. An initial screening assessment will determine if the lot is affected and to what extent. Refer to table 2 of the Guidelines.

Note: the mapped trigger distance includes a margin of error to account for the distance measured from within the carriageway as opposed to the carriageway edge as stipulated in the policy.
